

J-Write - from MWA Software

There are two products from MWA Software which are known as J-Write.
Which J-Write is for you?

- The J-Write Text Editor will give you fast text editing of megabytes of text.
 - The J-Write Component Library makes available the power of the text editor to users of Borland's Delphi programming environment - you can integrate the text editing engine into your own application.
- An earlier DOS Editor - SuperTED - is also available for download
